Experience

ESZ AG CALIBRATIONS & METROLOGY | Budapest

DevOps Engineer | 05/2023 - Present

I moved to a DevOps engineer position at the company.

My achievements at this role includes:

- Collaborated with QA and developers to implement an automated post-deployment notification system integrated with CI/CD pipelines and self hosted agents, delivering test results to MS Teams channels and email alerts, enhancing visibility into deployment health and streamlining cross-team communication.
- Implemented virtualized testing environments for QA automation engineers and Developers.

My responsibilities at this role include:

- Design, create and maintain software delivery processes for test and production environments.
- Create, design, administer and maintain application test and production environments (SQL Databases, Web Servers).
- Assist Software Developers with development.
- Create automation scripts and procedures for the software development and delivery process of live production and test systems.
- Create and maintain Azure Pipelines.
- Creating and maintaining technical documentation for software, architecture or automation and delivery processes.
- Maintenance of databases, web servers and IT systems.

ESZ AG CALIBRATIONS & METROLOGY | Budapest

Full Stack Software Engineer | 07/2022 - 05/2023

In my previous role at the company I contributed as a full stack developer.

My achievements in this role include

- The solo end to end development of a KPI tracking solution to improve visibility in work item delivery.
- Setting the initial architectural foundations of our latest product.
- Led the establishment of foundational frameworks for drive data-driven decision-making regarding user engagement.

My responsibilities included:

- Take part in requirement analysis.
- Implementation of new requirements.
- Further development of existing applications.
- Develop codebase improvement strategies.
- Programming of interfaces or modules and linking to existing applications.
- Documentation, unit test and code reviews of the implementations.
- Cooperate with teammates about design and implementation.

DATABANK LLC

Full Stack Developer | 05/2021 - 05/2022

I worked part-time as a remote Full Stack developer for one of Mongolia's largest FinTech company with an area of focus on online payment systems.

- Helped in the development of an online payment system using Python and Django, ensuring compliance with the ISO 8583 standard.
- Designed and implemented back-end functionalities.
- Built and optimized front-end components.
- Worked closely with a team to debug issues, improve performance, and deploy new features.
